Profile

Frontend Developer focused on building simple, responsive, and user-friendly web applications. I enjoy creating clean interfaces, good user experiences, and solving problems with modern web technologies.

Skills

Frontend	React, Next.js, Vite, TypeScript, JavaScript, TailwindCSS
Backend	Firebase, Supabase
Version Control	Git

Projects

Flet — **E-commerce Fashion Website**
Stack: Next.js, React, TailwindCSS, TypeScript
Built a simple and modern fashion website with product display, cart system and mobile-friendly pages.

Kiva — **Real-time Chat App**
Stack: React, Vite, Clerk, Firestore, Supabase, TailwindCSS
Created a live chat platform with user login, instant messaging and real-time updates.

Loka — **Real Estate Web Platform**
Stack: Next.js, React, TailwindCSS, TypeScript
Developed a real estate website for property listings, detailed pages, and agent contact form.

Àṣàfé — **Offline-first Community PWA**
Stack: React, Vite, TypeScript, Dexie, IndexedDB, Service Workers
Built a community web app where users can create and view posts offline with auto-sync when online.

Experience

Sep 2024 – Dec 2024 — **Frontend Developer Intern**, *SkyLink Logistics*
- Created a simple dashboard to track deliveries in real time.
- Made pages responsive for both phones and laptops.
- Worked with API data to clearly display shipment updates.

Jun 2025 – Aug 2025 — **Frontend Developer Intern**, *HealthHive Solutions*
- Built a clean appointment booking page for patients.
- Ensured the website works smoothly on all screen sizes.
- Added simple reminder features to help users manage bookings.

Education

2020 – 2024 — **B.Sc. Computer Science**, *Lagos State University*
